Lilian CONAN

Work-Study Contract – Mechatronics

Mechatronics engineering student at ENSIBS, seeking a work-study contract to apply my skills in embedded programming, modelling and electronics. Curious, rigorous and adaptable, I enjoy teamwork and technical challenges.

🎓 Education

MEng in Mechatronics

ENSIBS – Lorient, France

Since Sept. 2022

CPGE PCSI (Preparatory class)

Lycée Dupuy de Lôme – Lorient, France

2021 – 2022

Baccalauréat (High School Diploma)

Lycée Victor Hugo – Hennebont, France

2018 – 2021

Majors: Mathematics, Physics-Chemistry, Life Sciences.

📁 Work Experience

International Mobility – Renovation

Melderstein Manor – Råneå, Sweden

June – Aug. 2025

Renovation and maintenance work: painting, outdoor upkeep and versatile tasks in an international setting.

Production Operator (seasonal, 3 summers)

Cité Marine – Kervignac, France

June 2022 – Aug. 2024

Night-shift teamwork in the food industry, production line operations.

💻 Projects

Holonomic Robot Base

Academic project – ENSIBS

2025

Design and build of a holonomic base with sensors and actuators, controlled by an STM32 Nucleo and programmed in C.

Connected Temperature Sensor

Personal project

2025

IoT sensor on ESP32 using I2C bus and MQTT protocol, battery-powered, integrated into a home automation system.

Multi-Protocol Connected Speaker

Personal project

2026

Smart speaker built with a Raspberry Pi, wooden enclosure and 3D-printed parts, multi-protocol audio streaming.

⚙️ Technical Skills

Embedded Programming

C/C++ Python RTOS ROS2 ESP32 STM32 Arduino MQTT

Modelling & Simulation

SolidWorks Abaqus Méca3D Matlab Simulink

Electronics

PCB KiCad EAGLE Circuit schematics
